About Us
We are a team of highly motivated IoT enthusiasts - technocrats with the mission of building ultimate, comprehensive and affordable home automation, industrial automation and energy conservation solution.

As a collaborative, innovative team of engineers, we reflect our enthusiasm and total involvement in our assignments, which in turn speaks about our core values, culture, vision and mission of our company.

Home Automation:
In busy and fast pace of life, we want everything to be convenient, smart and connected. Imagine coming home where things have been take care in the way you like, Feels great doesn't it? . Imagine your devices in home can be controlled and monitored from any part of the world and seeing it just handmade perfect for you.
Life is too short to get up and switch On and off.

Light Automation - Radii
An end to end presence monitoring solution, offer complete control over your electrical device usage. It continuously monitors human presence and switches the loads on/off
Radii add's brain to your devices to help conserve energy - ultimately money**.**

Smart Parking - decebel
Sensors open new possibilities for smart parking.
Decebel is designed for detecting vehicles in parking aisle. It aims to improve parking space utilization and alleviating traffic congestion.
The system provides real-time monitoring of parking space availability, smart customer authentication and connected to other control systems such as barriers, card readers etc, for seamless control and data acquisition through IoT.

Energy Monitoring, conservation and Management - PULSE
> Detail energy monitoring and management
provides insight into your energy use and home activity through our mobile app and web app

See how much electricity you're using or when a basement light comes on. It identifies patterns in your energy use to help your family be more efficient, informed

See which appliances use the most energy and how much they're actually costing you. Track watts like footsteps or miles-per-gallon.
Set limits to stop using it further until further notice. Suitable for industries which operates in heavy load.
Integrate with you existing fixtures to avoid hassle.

Manage your electricity usage like time...

Healthcare IoT
Designed to enhance the health care experience for patients and to increase the operational effectiveness of the hospital and also reducing energy consumption.

IoT Solutions
What you can offer.)Have a different idea, give it to us. Let's build some awesome stuff together

Industrial Automation
Expand your existing facility with IoT driven solution. Step on to Industries 4.0

To add

1. **Maps location in site**
2. **Address to be added**

3. **In place of the load more button, what to be added ?**
4. **Make the initial landing page totally clickable - the current version has only lower side clicks.**
5. **To add more boxes for contents**
6. **Page fix - server error (404) and successful submission of mail.**
7. **Contact us page**
8. **What does distributed by dotndash mean?**
9. **Instead of our sponsors - add clients**
10. **Add terms and condition**
11. **Remove newsletter subscription n add Lets be in touch**
12. **And above the text box, let us get back to u, we'll send timely updates… (// lets add something like that //)**
13. **Shop - coming soon page (wordings to be changed)**
14. **Our guarantee - customer satisfaction options which we have done (customer centric)**
15. **Your account - customer profile generation linked with shopping cart**
16. **Affiliates - marketing options**
17. **Our sponsors - remove and add (our clients**
18. **Add in the page top - Home , Services , Products , contact us, partner with us , cart , FAQ.**
19. **Make the rocket (back to top) button floating and dynamic in screen - rather than being in bottom .**

Address

No.2, Startup Labs,SIIC, SRM University, SRM Nagar, Ktr -603203

No 606, Navin's Eden park, gerugambakkam, Kundrathur Main Road, chennai - 600122
